now i want to build a student excuse generator like if the student has not done homework or assignments the output will be a excuse template like: mekul couldn't finish the assignment because the laptop decided to install updates for six hours.
1.take input for username and use it in the final output
2.make 10 excuse templates
3.make excuses that happen in real life situations
4.make the whole programme in cpp

Thought for a couple of seconds >

Bhai ye raha Student Excuse Generator in pure C++ — user ka name input lega, random excuse choose karega, {name} ko actual name se replace karega, aur final excuse print karega.

C++

```
#include <iostream>
#include <cstdlib>
#include <ctime>
using namespace std;

int main() {
    string name;

    cout << "Enter student name: ";
    getline(cin, name);
```

inherit.cpp read.cpp read2.cpp vector.cpp vector2.cpp vector3.cpp mcq.cpp vibecoding.cpp vector4.cpp data.txt x.cq

vibecoding.cpp > main()

```
1 #include <iostream>
2 #include <cstdlib>
3 #include <ctime>
4 using namespace std;
5
6 int main() {
7     string name;
8
9     cout << "Enter student name: ";
10    getline(cin, name);
11
12    string excuses[] = {
13        "{name} couldn't finish the assignment because the laptop decided to install updates for six hours.",
14        "{name} couldn't do the homework because the internet stopped working right when research was needed.",
15        "{name} forgot the assignment notebook at home after carrying it everywhere for the whole week.",
16        "{name} couldn't complete the work because there was a power cut and the laptop battery was already dead.",
17        "{name} was about to submit the assignment, but the file got corrupted at the last moment.",
18        "{name} couldn't finish the homework because relatives came over and turned the house into a family function.",
19        "{name} completed half of the assignment but fell asleep while waiting for the laptop to charge.",
20    };
21
22    srand(time(0));
23    int randomIndex = rand() % excuses.size();
24    cout << "Generated Excuse: " << excuses[randomIndex] << endl;
```
